This paper analyzes the link between economic growth and structural reforms. The paper highlights that as the recovery from the financial crisis firms up, many country authorities will turn their focus from short-term stabilization policies to more structural policies to spur long-term potential growth. The paper discusses that the global

Recent research has suggested that it is possible to improve welfare by including asset price fluctuations or indicators of financial vulnerability in the monetary policy rule. The IMF (2009) and Kannan, Rabanal, and Scott (2009) have examined the role of reacting to excessive credit growth in a model where housing collateral alleviates credit constraints.
