Palm OTDR - Aparat de masura fibra optica CETC - AV6416 . AV6416 palm OTDR is the newest instrument designed for testing FTTx network. It s mainly used to measure the physical characteristics of optical fiber under test, such as the length,the transmission loss and the splice loss etc.. It can also locate the faults or breaks of optical fiber. It s widely applied in the manufacture

Klein Instruments

Klein Instruments is a manufacturer of fast, high quality colorimeters. Klein has been the most trusted name in color measurement since 1983. Our clients include some of the biggest names in display manufacture and color correction.
