Starting off from the theosophy and kindred New Age movements which were popular in early 20th century Germany, Pringle demonstrates convincingly that

The Master Plan is a groundbreaking expos of the work of German scientists and scholars who allowed their research to be warped to justify extermination, and who directly participated in the slaughter--many of whom resumed their academic positions at war's end. It is based on Heather Pringle's extensive original research, including previously ignored archival material and unpublished photographs, and interviews with living members of the institute and their survivors.
