Trade linkages, balance sheets, and spillovers: The ...  
This paper highlights several important policy implications based on a quantitative assessment of spillovers in the context of the Germany-Central European Supply Chain (GCESC). The deepening of economic integration associated with the GCESC has changed the strength and nature of the trade channel across member countries. Because stronger trade linkages have been built to an important extent through the exchange of intermediate goods, German spillovers to the CE4 (the Czech Republic, Hungary

Trade Linkages, Balance Sheets, and Spillovers - IMF  
Germany and the Czech Republic, Hungary, Poland, and Slovakia (the CE4) have been in a process of deepening economic integration which has lead to the development of a dynamic supply chain within Europe the Germany-Central European Supply Chain (GCESC). Model-based simulations suggest two key policy implications: First, as a reflection of strengthening trade linkages, German fiscal spillovers to the CE4 and more broadly to the rest of the euro area, have increased over time, but are still
